Response to Arguments

1. Applicant's arguments, filed 3/28/2005, with respect to the rejection(s) of the claim(s) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

The examiner agrees with applicant that the teaching of Spatafora is non-analogous art and does not solve the problem that the applicant is trying to overcome. The amendment below is for the purpose of placing the sensing arrangement in a "means plus function" format.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jimmie Oaks on 6/10/2005.

- a. In claim 1, line 9, removed "at least one sensor mounted to said baling machine at a location for detecting whether the wrapping sheet is present on the surface of the bale." and inserted –means for sensing the presence of the wrapping sheet on the surface of the bale while in the baling chamber.—
- b. In claim 3, line 1, removed "sensor" and inserted –sensing means--.
- c. In claim 4, line 1, removed "sensor" and inserted –sensing means--.

- d. In claim 5, line 1, after "wherein", inserted --said sensing means includes--.
- e. In claim 5, line 2, removed "are provided"
- f. In claim 6, line 4, removed "sensor" and inserted --sensing means--.
- g. In claim 7, line 2, removed "sensor" and inserted --sensing means--.
- h. In claim 8, line 1, removed "sensor" and inserted --sensing means--.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: the baling machine, with a sensing arrangement comprised of sensors which are mounted in proximity to the baled material and detect the presence of the wrapping material on surface of the bale itself has distinguished itself over the prior art of Kluver which teaches that use of a sensing arrangement which detects the presence of wrapping material in the feed section only.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Durand whose telephone number is 571-272-4459. The examiner can normally be reached on 0730-1800, Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi I. Rada can be reached on 571-272-4467. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
